(54) Title: ANTENNA ARRAY

(57) Abstract: The invention relates to a dielectric antenna comprising a substrate of a dielectric material and with a feed line on a front face of the substrate and a ground metalization on a rear face of the substrate, which ground metalization extends up to the front face of the substrate. These dielectric antennae can be designed for application in different frequency bands, for example GSM 900, GSM-PCS, GSM-PCS, UMTS, CDMA and Bluetooth.
